

Deep Dive Analysis & Interactive Dashboarding Report

Prepared By

Manogna Akula

ApexPlanet Data Analytics Internship

1. Introduction

The purpose of this project is to perform a detailed analysis of sales performance and identify key business insights through data-driven techniques. A dashboard mockup was created to visualize important metrics and support decision-making.

2. Key Performance Indicators (KPIs)

Total Sales

10,032,628.85

Top Customer

Euro Shopping Channel

Top Product Line

Classic Cars

Top Country

USA

Highest Sales Month

November

3. Customer Performance Analysis

Customer analysis revealed that Euro Shopping Channel generated the highest revenue with total sales exceeding 912,294.

The top customers contribute a significant share of overall business revenue, indicating the importance of customer retention and relationship management.

Euro Shopping Channel generated the highest revenue among all customers.

4. Product Performance Analysis

Classic Cars generated the highest revenue among all product categories with sales exceeding 3.9 million.

Vintage Cars and Motorcycles also contributed significantly to total revenue.

The analysis indicates strong customer preference for Classic Cars.

Classic Cars is the highest-performing product category.

5. Country Performance Analysis

The USA generated the highest sales revenue followed by Spain and France.

International markets contribute significantly to overall business growth, highlighting the importance of global operations.

USA contributed the highest sales revenue.

6. Monthly Sales Trend Analysis

Monthly sales analysis showed significant variation throughout the year.

November recorded the highest revenue while June recorded the lowest.

The increase in sales during the final quarter suggests seasonal demand and higher customer activity.

November recorded the highest sales performance.

7. Deal Size Analysis

Medium-sized deals generated the highest revenue contribution.

This indicates that medium-sized transactions form the foundation of the company's revenue stream.

Medium-sized deals contribute the majority of revenue.

8. Dashboard Overview

The dashboard includes:

- Total Sales KPI
- Top Customer KPI
- Top Product KPI
- Top Country KPI
- Monthly Sales Trend
- Product Performance
- Customer Performance
- Deal Size Distribution

The dashboard provides a consolidated view of business performance and supports quick decision-making.

Sales and Revenue Per Unit show strong positive correlation.

9. Key Findings

1. Euro Shopping Channel is the highest revenue-generating customer.
2. Classic Cars is the highest-performing product line.
3. USA contributes the highest sales revenue.
4. November recorded the highest sales performance.
5. Medium-sized deals contribute the majority of revenue.

SALES PERFORMANCE DASHBOARD - Task 3

TOTAL SALES
10.03 Million

TOP CUSTOMER

Euro Shopping Channel

TOP PRODUCT

Classic Cars

TOP COUNTRY

USA

KEY FINDINGS:

- Euro Shopping Channel is the highest revenue customer
- Classic Cars generated the highest revenue
- USA is the top-performing market
- November recorded the highest sales
- Medium-sized deals contribute the largest revenue share

10. Recommendations

- Focus marketing efforts on high-value customers.
- Expand the Classic Cars product category.
- Strengthen operations in the USA market.
- Develop strategies to increase sales during low-performing months.
- Encourage medium-sized transactions through targeted promotions.

11. Conclusion

The deep-dive analysis successfully identified important business trends, customer behavior patterns, and revenue drivers. The dashboard mockup provides a clear visualization of performance metrics and supports data-driven business decisions.
